4 IN 1 TRICYCLE KAYA

T6079

This multifunctional 4 in 1 balance bike KAYA grows with the cycling needs of your little one. This model easily converts from tricycle to balance bike by folding both rear wheels inward. This makes the transition to a bike with pedals easier. The pedals are easy to mount and conveniently stored on the frame under the saddle. The saddle and handlebars are both adjustable to the needs of the child. The handlebar is adjustable in 2 positions, the lowest position of the saddle is 32 cm and the highest position is 35 cm. This balance bike can be used to develop the coordinated movement ability of your child to exercise and thus also learn to keep good balance.

Product use: 18 months to 5 years, max weight 25 kg
Dimensions unfolded: 69 x 45 x 51 cm
Weight: 4,5 kg

4 IN 1 TRICYCLE WITH PUSH BAR LIO T6080

This 4 in 1 balance bike LIO introduces the little ones to the fun of cycling! When the little one is still too small to ride a bike or walk, mom or dad can push the little one with the push bar. The child sits safely in the seatbelt and safety ring. The push bar and safety ring can be removed. This model is easy to convert from tricycle to balance bike, by folding both rear wheels inward. This makes the transition to a bike with pedals easier. The pedals are easy to mount and conveniently stored on the frame under the saddle. The saddle and handlebars are both adjustable to the child's needs. This balance bike can be used to exercise your child's coordinated movement skills, also learning to balance well. The balance bike is compact and lightweight. Super easy to carry!

Product use: 1 to 5 years, max. weight 25 kg.
